

# 5 POINT LOCK THE GATE PLAN

1. Put up LOCK THE GATE signs at the entrance to your property.
2. Do NOT speak to the gas company representatives on your property. If you want to speak with them go somewhere neutral – this utilises the trespass laws to the farmer's advantage.

Charge the mining company for your time, invoice them consultancy fees. Remember, do not sign anything that entitles mining access to your land.

3. Inform other farmers and friends, help them become aware of the first 2 points - this is people as a community coming together and working together to achieve a common goal.
4. All gas wells fail eventually, so rural SW communities need to say NO to gas wells and say NO to a gas industry in the SW. Future generations are counting on us to protect this fragile eco system and our WATER!
5. People power works best when people stand united as one voice and as a community supporting each other.
